Chelsea Flower Show Launch: The First All Weather Natural Wicker Furniture

Oxley's Furniture are excited to present the very first natural wicker furniture that will stand the test of time come rain or shine

Oxley's Furniture are at the cutting-edge of weather-proof furniture built to last for generations. Following this ethos, Oxley's is proud to launch the first Natural Wicker Furniture in the UK that can be used outside as well inside.

This beautiful furniture is hand-made from double weave wicker, the natural eco-friendly alternative to woven plastic. The wicker used is farmed by being planted, harvested, soaked in spring water and red sand, and then treated for exterior usage. Finally, it is hand woven into double thickness creating unrivalled strength and stability.

The first of its kind, this natural furniture can be left outside to be enjoyed all year round, requiring only a special lacquer to be applied annually. The range includes armchairs, dining chairs, sofas and coffee tables and will be shortly followed by beautiful relaxing loungers.

Oxley's will be exhibiting their innovative 2008 wicker collection at The Chelsea Flower Show on stand SR10. Help them celebrate fifteen years of exhibiting at the show with a glass of bubbly on **Monday 19th May 2008**.
